Grade: ASAFLEX™ Series

Asahi Kasei Chemicals Corporation Synthetic Rubber Division
Elastomer Sales Dept. 1
1-105 Kanda Jinbocho, Chiyoda-ku, Tokyo 101-8101 Japan

ASAFLEX™ with low birefringence

ASAFLEX™ has low birefringence and wavelength dispersion comparable to PMMA resins. It is an ideal optical material requiring impact strength and flexibility.

All data and values based on specific test methods, and given for basic reference only and not as any warranty or specification. Applications shown for illustration only, and represent no warranty of suitability or non-infringement of intellectual property rights. The product of Asahi Kasei Chemicals shown herein must not be used for any medical device or drug, except with its express written consent. ASAFLEX™ is a trademark of Asahi Kasei Chemicals Corporation.
